# Clarilis AI Draft

Leverage the power of LLMs to enhance your drafting experience

Use AI Draft to provide first draft definitions, clauses, schedules and additional documents. Build on your templated precedent to add additional content and validate your bespoke drafting.

Take your automation further with Clarilis AI Draft

- Use AI Draft to enhance your automated drafts from Clarilis

- Benefit from matter context and the codified legal knowledge of Clarilis' PSLs

- No need for prompt engineering with Clarilis' task-based approach

Clarilis AI Draft features

Use AI Draft to enable drafting of novel content or help verify manually drafted content from within the Clarilis platform

- No prompt engineering: No need to learn how to prompt or spend hours crafting prompts – it's all built into the platform

- Content aware: AI Draft understands the difference between different types of contractual drafting. Definitions, clauses, schedules or whole documents – AI Draft will create the appropriate style of content

- Context aware: AI Draft has access to the wider matter context, ensuring highly relevant results

- Drafting transparency: Any AI generated content is highlighted once inserted into the Word documents so you are always clear on the source of your content

- Smart integration: Automatically determines the correct placement for your AI generated content within your draft documents

- Seamless formatting: As with all Clarilis documents, content is formatted in your firm's house style
